# hot color, cool cuts

For unbeatable beauty, be sure you have the best of both worlds.

**HEAVY STREAKS** that range from copper to near gold add intrigue to this mid-length bob. With a shorter front section that's coaxed over the face, the look just hits the shoulders and is blown-out to smoothness, then flat-ironed all over.

## WARMER COLORS

always come to the forefront during the winter months, as demonstrated by this brunette mane with a glaze of auburn over the surface. Styling hair ultra-straight adds shine and enhances the color treatment.

## MAKING HEADS TURN

is guaranteed with a color treatment that pairs black with a bleached-out panel on top. The cut is perfect for showcasing the hue; razored ends are styled for flare with sharp, diagonal bangs lending up-front interest.
