Planning with the experts.

That's why we've put together the Bridal Planner. With so many things to think about it's easy to neglect *your* personal beauty needs. Our Bridal Planner will help you map out a comprehensive course of treatments. One that allows abundant time to achieve ultimate fitness for your hair, skin and nails - with ease and pleasure. Mitchell's Salon & Day Spa has over thirty years of experience with bridal services. This brochure will serve as both a reminder of all your beauty necessities, as well as a guide to formulating your own distinct beauty regimen for your special day ahead.

Why work with experts?

We will walk you through the different services and help you decide how far ahead of your big day you should begin incorporating them. We will help determine how often and at what intervals you should schedule facials, manicures, hair treatments and more for best results. We will give you tips on the best hair and makeup for photography, as well as tips on last minute touch-ups.

Keeping stress at bay.

Planning a wedding can be very demanding. Our Bridal Planner encompasses mind, body and spirit. A soothing massage can make the difference between a relaxed bride or a stressed bride. We will help you pick services that will ease your tension as they rejuvenate your body.

Countdown to perfect hair.

Don't wait until the week prior to your wedding to try out your desired hair style or you may get more than you bargained for. How many weddings have you attended where the bride looked like a stranger in an uncustomary bouquet or sudden change to blonde? What might they not get to go back and re-shoot that treasured wedding album?

Start trying hairstyles as soon as you start trying on gowns.

First, make sure your hair is and stays in optimum condition. A series of regular conditioning treatments will get weather or styling damaged hair prepped for optimum performance. They will help dehumidify your hair and create protection against other weathering factors. Get cuts regularly to keep ends in shape. Whether you are going for a new hair style or an updo, try adding a touch of color for superior shine and to give depth and interest to your style. Remember, it's the details that bring the picture to life. Allow yourself time to live with your new look. Several salon visits will help you get a sense of how your hair will look on your wedding day.

Give yourself and your stylist time to perfect it.

It's also beneficial to give your hair designer time to work with your hairstyle and your desired look prior to your wedding, especially if the style or stylist is new to you. You want time for your stylist to see how your hair responds in different weather conditions, how well it holds curl and how well it lays. Starting early may also surprise you. You may find that the swept back ringlets that looked so chic in the magazine really doesn't suit you.

Making sure time is on your side.

Trying to cram a personal beauty regimen into a few days or a week has about as much chance of success as using a fad diet to suddenly drop twenty pounds. Get a head start and relax into a routine of luxury and pampering. You will find a simple grooming plan will make staying on track easy. Avoid last minute panics over blotchy complexions, unmanageable hair or nails that are brittle or unpainted. You will look radiant and feel stress free.

We suggest starting eight months prior to your wedding.

Why so long? Even the healthiest hair, skin and nails are subjected to an everyday onslaught by wind, weather, sun and heat. Starting early gives damaged or tired hair, skin and nails time to heal and helps normal hair and skin stay off the damaging effects of the elements. It also gives you time to learn what services and products work best for you.

Rejuvenation Revamp

Hair

Hair needs to be in top condition for ultimate shine and manageability. Regular conditioning and deep conditioning treatments keep hair healthy and free of split ends, especially important in humid conditions or if exposed to excessive temperatures. Regular use helps with frizz and styles better. Regular use also gives you and your stylist time to make any style adjustments. Color services add richness, shine and depth to all hair, even your own color. Color treatments stimulate your style for added interest. As only your stylist can do any color adjustments you may want to make.

Skin

Facials are one of the most important treatments. Not only do they help heal dried or damaged skin, they keep pores clean and unclogged. Young, radiant skin is our ultimate achievement. That is why we strongly suggest facials to give your skin time to relax and rejuvenate. Facials work wonders for your back too, especially for any rashes or blemishes you may have. Facials stimulate hair growth and supply on both hands and feet. The better you maintain your skin, the better the results. Waxing removes ingrown hairs and may prevent hair from growing back. Waxing is a great option for your body.

Nails

To make sure your nails are in top shape, we recommend monthly manicures and pedicures. This allows enough time to condition your nails, strengthen your nails and keep your nails well-maintained.

Massage

Massage therapy works both inside and out. It stimulates circulation, which brings in a rejuvenating rush of oxygen. Massage has long been known to have wellness properties, relieve stress and create a sense of peace and relaxation. Monthly massage treatments help relax your body, improve skin texture, improve posture and other essential areas.

Flawlessly radiant skin.

Nothing compares to the radiance and glow of beautiful skin. And nothing is more often taken for granted. For those of us with less than perfect skin, now is never too early to begin a healthy skin regimen. That also goes for your entire body. Especially for the bride with the bachelorette party, the extremely time-pressed bride or for the stress-ridden bridesmaid bride.

Schedule monthly facials for a more refined, even complexion.

If you think beauty is skin deep, guess again. A beautiful complexion starts deep below the skin's surface at the cellular level. Our facials use methods and products that penetrate below the surface to stimulate proper cell renewal, improve circulation and help restore the skin's natural moisture. This gives time to thoroughly heal and develop a beautiful, even tone.

Waxing beauty.

On this most special of days you don't want to be caught with razor stubble, or unkempt brows. Start waxing early to slow hair regrowth and finish early to avoid breakouts or redness.

The perfect canvas, for the perfect makeup.

With your skin in optimum condition, you will find your makeup applies smoother and more evenly. Healthy skin has tight pores, allowing foundations and blushes to go on smoothly for a delicate finish.

Who gives this hand?

From the time he slips on the ring and for that special close-up of your hand in his make sure your hands look flawless. Begin manicure early enough to ensure cuticles are in tip-top shape and nails are strong.

Package Snapshot

Making memories...from now to now.
